

Type 2-S 160mm x 5.0m
with steel ferrules
shown

Flat Woven Steel slings manufactured by Andromeda are very flexible as I've seen them basketed close to capacity around steel beams with no kinks after use. Even FSWR slings basketed under moderate loads with packing around a steel beam shall get kinks and I would not consider using wire rope slings in the same way as they would be kinked even with edge protection in use.
