

## LIFTING BAG

FOUR STRAPS FOR  
EASY HANDLING

EXPRESS COUPLING

NPVC FOR HIGH RESISTANCE

INTERNAL STRAPS TO ENSURE  
PLANE SAFE LIFTING

**STROKE UP TO 1000MM**

**This range of low pressure lifting bags was designed for any operation requiring emergency cushions with large lifting capacity and great stroke.**

**This range is available from 3T to 12T and the working pressure is 1 bar.**

**Their constant lifting capacity and low thickness will be a great benefit to all relief operations for road, air and rail accidents, on building sites, or natural disasters, and this on any type of soil.**

## FEATURES

- ▶ Great stroke: 1000mm for high lifting
- ▶ Lifting force up to 12 Tons
- ▶ Only 5cm thick for easy insertion in narrow gaps
- ▶ Low pressure system 1 bar for safe lifting on thin structures
- ▶ Nitrile material for high resistance to hydrocarbon
- ▶ No deformation, planes surfaces for safe lifting
- ▶ 4 carrying handles for easy carrying
- ▶ Safety factor 3/1
- ▶ Complies with norm EN 13731

Scorp'air ES					
Model	Size		Working pressure	Lifting capacity	Air volume while in pressure
	Diameter	Stroke			
	mm	mm	bar	tons	L
